

# RM<sup>TM</sup> Learning Platform

Simply a better learning platform

For so long learning platforms have been complicated systems that have been time-consuming to set up and manage, and with so many pressures on resources and budgets who has the time these days? What you really want is to stay informed, and a quick way of completing key tasks that's simple and intuitive. What you need is a system that actually works for you and fits in with your busy schedule.

We think it's time to take a look at the new RM Learning Platform. Without compromising on the features and tools you need, it's simply a better learning platform...

# RM Learning Platform

## 1. Simple to Use

With so much pressure on resources these days you have to make the most of what little time you have. We recognise you need key information and tasks at your fingertips, without having to spend precious time searching multiple locations.

The RM Learning Platform is jam-packed with features designed specifically to make your life easier. Your personal feed will deliver news, messages, and updates from your

"Since setting up the Governors space on the RM Learning Platform the resource saving in terms of time and paper has been immense. I have estimated that the school has saved over £500 per year"

**Anne Bennett, Headteacher  
Foley Infant School**

management information system, blogs, discussions and more. To suit the way you work you can have feed updates emailed to your inbox, and setting up new alerts takes seconds.

Setting and managing assignments is so easy with a simple wizard to assign tasks to your learners; so you can be sure your class need never miss out on all those great learning activities you have in mind for them. And your current assignments are at

hand for you and your learners in your Home page as soon as you log on – let's see the dog try and eat that homework!

From administration to setting up pages, capturing a video or handing in assignments, the RM Learning Platform gives you an intuitive and simple environment to save you time. We want to give you back the time you need, to focus on the other tasks you have to juggle.

## 2 Fun & Engaging

Let's be honest, everyone wants to work or learn in a nice environment. Bright airy classrooms are just nicer places to be, and often more productive. So why should it be any different when you're online?

The RM Learning Platform has a contemporary and intuitive interface that delivers the information and tasks you need the minute you log on, with a great range of themes for everyone to choose from. There are choices for younger users with more large icons, as well as themes to support visual impairments, dyslexia and even a Widgit symbol-based

theme. You can select from various colour palettes to suit your mood, or opt for something a bit more fun with loveable bunnies or meerkats.

And our range of options for your v-Me™ avatar just got much bigger. Maybe today you want to be a pirate, or how about a daring spaceman? If you fancy a new pet we've got penguins, aliens, dragons and sheep to name but a few.

Now doesn't that sound like somewhere you want to spend a bit of time?

"Learners are excited, wanting to 'log on', join in discussions, do extra home learning linked to their topic and upload it for marking. Their IT skills have grown overnight... They are highly motivated and are pushing their older siblings off the internet as they want to access their space!"

**Jacqui Johnson, LR ICT Co-ordinator, Eureka Primary School**

## 3 A Learning Platform for Everyone

You have to be sure that all your learners are given the same opportunities, and the learning platform supports that objective regardless of a learner's age or ability. As well as a range of themes to suit different ages and abilities the overall design has been created in line with Web Accessibility Guidelines; and we've added a number of other features we think you'll find very handy.

Symbols can help support users with learning difficulties, younger users or even users with English as a second language. We've integrated the Widgit Point and Insite applications so that you can create content using symbol and text combinations, or see symbol alternatives to words you're not familiar with when and where you need them in the platform.

The MyZone interface revolutionises how a learning platform can be accessed. With easy-to-use navigation, users with special needs or younger users have the power to

access their resources, a planner, and their work in a way that's unlike any other platform. MyZone can be accessed with mouse, rollerball, touch screen or switches.

There's so much more to the RM Learning Platform to support a variety of access needs including a 'More Accessible Mode' and one-click video and sound recording. Now don't your learners deserve chances like these?

"Students that thought they couldn't do ICT are coming into school asking if we are using the RM Learning Platform today. They love the fact that it's their areas to tweak, or customise as they choose."

Andrea Perry, HOD of ICT –  
Christ Church Middle School

## And that's not all!

As well as all of this great stuff, don't forget that the RM Learning Platform also offers:

- Unrivalled integration with your Management Information System to create your user accounts, and share key data with parents, teachers and learners such as attendance, behaviour, assessment and progress information.
- Parent and carer accounts are completely free and automatically provisioned from your management information system.
- Personalised e-portfolios for teachers and learners to store and share information and achievements.
- A fantastic range of tools to tackle the challenges of delivering effective Assessment for Learning, including managing learner goals and targets, whether they are subject-specific, linked to a framework, or a long term aspiration.
- Shared online spaces for courses or extra-curricular activities where you can create rich-content, securely store and share documents, communicate and collaborate through discussions, blogs and surveys, and loads more.

There's so much more to the RM Learning Platform, but it's all there in an accessible, fun and intuitive interface that we think you'll love. Maybe that's why it's simply a better learning platform.

"The RM Learning Platform is making an enormous difference to the link between home and school. We are more aware of the topics the boys are covering in class. From a parent point of view it is excellent to have dates at the press of a button, ditto for newsletters and also notes on parent-teacher consultations. A valuable asset to our school."

Sarah Donovan, Parent, Rush Common Primary School
