

Microsoft®
Silverlight™

The MLS Guide to installing Silverlight on your Microsoft Windows or Apple Macintosh Operating System

This document covers the compatibility of the Silverlight client interfaces. The Management interface will still require a windows operating system as per the current system specification documentation.

Check Your Silverlight Compatibility

Silverlight Compatible Operating Systems and Browsers

	Windows Internet Explorer 8	Windows Internet Explorer 7	Internet Explorer 6	Firefox 2,3	Safari 3	Safari 4
Windows Vista	✓	✓	✗	✓	✗	✗
Windows 7	✓	✓	✗	✓	✗	✗
Windows XP SP2, SP3	✓	✓	✓	✓	✗	✗
Mac OS 10.4.8 + (Power PC)	✗	✗	✗	✗	✗	✗
Mac OS 10.4.8 + (Intel based)	✗	✗	✗	✓	✓	✓

✗ Not Supported ✓ Silverlight 2.0 & 3.0

Silverlight Minimal Requirements

Components	Requirements
Personal Computer running Windows	X86 or x64 500-megahertz (MHz) or higher processor with 1GB of RAM
Mac OS 10.4.8+ (PowerPC)	PowerPC G4 800-MHz or higher processor with 2GB of RAM
Mac OS 10.4.8+ (Intel-based)	Intel Core Duo 1.83-gigahertz (GHz) or higher processor with 2GB of RAM

Recommended

Use Silverlight in the **32 bit** Internet Explorer process on x64 systems. Most browser plug-ins (including Silverlight, Flash, Java and almost all ActiveX controls) only currently work in 32 bit browsers.

Installing Silverlight on Windows Operating Systems

1. Verify your Silverlight compatibility (see page 2)

Ensure the computer is running a Silverlight-compatible Windows operating system and browser; and that any previous versions of Silverlight have been uninstalled.

2. Download Silverlight

Go to <http://silverlight.net/getstarted> and click on

For Windows Internet Explorer users:

A prompt will give the option to either **run** or **save** the installation file (**Silverlight.exe**). Click **Run** to start the download.

Once the download is finished, the browser prompts again to **run** the installer.

Click **Run** to start the installation.

Note that sufficient administrative privileges are required to install Silverlight.

For Mozilla Firefox users:

Save **Silverlight.exe** to your hard disk.

Once the download is finished, click **Open**. The installation starts.

3. Install Silverlight

Please note the Windows Vista operating system will prompt for security permissions. To continue, these prompts need to be approved / allowed.

Click '**Install now**' after reviewing the license agreement and privacy statement.

If a previous version of Silverlight was installed, or the browser is Mozilla Firefox, the browser will need to be restarted at this point.

4. Verify the Installation

Verify your installation by experiencing the Silverlight site

<http://www.microsoft.com/silverlight/default.aspx>

For Silverlight installation support visit the Microsoft support page

<http://support.microsoft.com/common/international.aspx>

Installing Silverlight on Macintosh Operating Systems

1. Verify your Silverlight compatibility (see page 2)

Ensure the computer is running a Silverlight-compatible Macintosh operating system and browser and that any previous versions of Silverlight have been uninstalled.

2. Download Silverlight

Go to <http://silverlight.net/getstarted> and click on

For Apple Safari users:

Once the download is finished, an information window will warn that **Silverlight.dmg** contains an application.

To proceed with the installation, click **Continue**.

For Mozilla Firefox Users:

Save **Silverlight.dmg** to your hard disk.

Once the download is finished, click **Open**.

Double-click **Silverlight.dmg**.

3. Install Silverlight

The installer will warn that "This package contains a program that determines if the software can be installed." Click **Continue**.

On the **Introduction** page, click **Continue**.

On the **Select Destination** page, select a destination volume for Silverlight, and then click **Continue**.

On the **Installation Type** page, click **Install**.

Authentication is required. Enter your **Administrator** user name and password. Click **OK** to continue.

On the **Finish Up** page, click **Close** to exit the installer.

4. Restart your Macintosh and Verify the Installation

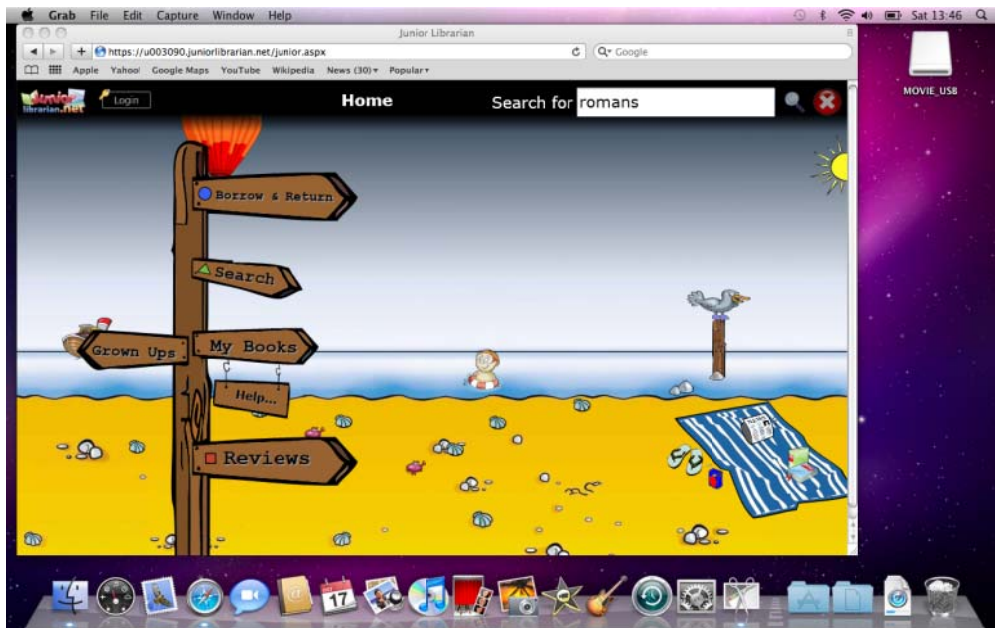

Mac's must be restarted before activating new Silverlight plug-in. Restart the Mac to complete the installation.

After restarting the Mac Verify the installation by experiencing the Silverlight site
