The specialist learning platform for primary schools

- Easy to use
- Free content
- Full support

dB primary

The specialist learning platform for primary schools

DB Primary has been designed specifically for the needs of primary schools in collaboration with teachers and curriculum consultants. With ease of use at its heart, the platform is instantly usable and provides real educational value.

Safe & secure
With an anti-bullying device, reports for all platform activity and a safe email system, DB Primary provides pupils with a safe and secure online environment.

What makes DB Primary special?

Personalisation & Independence

All users have their own e-portfolio, blog, email and calendar, allowing pupils to take ownership of their own virtual learning.

Accessible & Intuitive

The built-in paint, drawing, video and text tools allow pupils to contribute using their preferred method of communication. The picture login facility means that all pupils can log-in regardless of age or ability.

Communities & Collaboration

Communities encourage collaboration between users through discussion and sharing of work. Teachers can easily create interactive resources with the built-in survey, quiz, wiki and forum features.

Task Management & Assessment

The Task Management tool aims to reduce the overhead of task setting and marking. Teachers can quickly set recurring tasks on a daily, weekly or monthly basis and easily monitor progress. The automatic marking feature of quiz tasks is a great time saving feature.

Parental Engagement

Parents can view and comment on their own child's work and activity. Teachers can easily share and publish information to parents through the use of parental communities.

Why choose DB Primary?

"Within just a few weeks Editure have trained and inspired staff members and we now have a Learning Platform with which we are delighted. I would happily recommend DB Primary to other schools."

Halden Eady, Headteacher, St Mary Magdalen Catholic Primary School, Brighton

"1. It is more child friendly
2. More interactive and social
3. Much simpler and more enjoyable to use."

Year 6 pupil, Tollgate Community Junior School, Eastbourne

"The parents were stunned at the use of ICT at such a young age, and couldn't imagine what the children would be doing in ten years' time."

Dughall McCormick, e-learning consultant for Kirklees LA and former teacher
